

Medications & Supplements

Medications

Attached is a form to be given to your child's physician should your child require medications during the school day. All medications both prescription and over the counter require a doctor's prescription. All prescriptions are valid for (1) year. Any change with dosage or timing requires a new prescription on file at school.

Please have your physician complete the attached form as soon as possible. Your physician may make copies of this form for additional prescriptions.

Supplements

If your child needs a drink supplement (Boost, Pediasure, etc.) during their school day, Larc is now requiring a note from the physician requesting this. It is also the family's responsibility for supplying the supplement.

Please call the Health Office if you have any questions.
